MANY COMPLAINTS AT RATE PAYERS ANNUAL MEETING

The annual ratepayers meeting was held in the council chambers on Friday evening last, with a good number of ratepayers present. Wm. Knight acted as chairman.

The chairman of the different committees of the council gave their reports for the year past. It was pointed out that some of these reports were very unsatisfactory to the citizens present at the meeting. Many questions were asked, but few seemed to be answered in a satisfactory manner.

The reports were as follows: The report of the School Board Amundsen. This was apparently favorably received by the meeting, the report showing a high percentage of pupils passing examinations.

Chairman J. M. Soly of the Public Works committee read his report for the year past and was deluged with questions which he was more or less at a loss to answer.

As Comptroller D. A. Anderson, chairman of the Fire Department committee was absent, Secretary Treasurer Amundsen read his report for him. The report proved to be satisfactory to the assembly.

When the report of the Health, Relief and Finance committee was given, there was criticism of appointing a medical health officer without letting it be known that applications were to be received. This appeared to reflect on the chairman of the committee, Councilor Walls, who thereupon stated that he had not been consulted on this matter, that it had been done over his head without his knowledge or consent, and, further, that all other matters under the jurisdiction of the committee had during this term been disposed of in the same manner.

Mayor Ringrose replied to this to the effect that he had not consulted Councilor Walls on health committee matters because he thought Mr. Walls was too busy with his market and stock shipping business to attend to them. To which Councilor Walls replied that he had accepted the position with a full knowledge that it would take some time, and had at all times been prepared to devote the necessary time to the town's business.

G. M. Uddley, chairman of the Finance committee, had to answer a question re "grants and donations." Among other things it was brought out that the council had presented the bank manager and accountant with Christmas presents of jewelry. The assembled ratepayers very plainly did not fancy this liberality with their money for such a purpose.

The chairman of the Waterworks committee, Geo. Maxwell, presented his report, which was considered satisfactory, although the department shows a deficit of \$5,235.74.

G. L. Reinecke reported as chairman of the Light and Power committee. This report was also a storm center. Ratepayers criticised the administration for entering into a large expenditure of money as involved in the purchase of the new engine without giving the ratepayers an opportunity for full discussion and expression of opinion. Some were of the opinion that if he purchased at all it should have been financed by the issue of debentures instead of taking it out of current revenue as is being done. Others believed the town should have accepted a hydro-electric proposition and were confident that if the ratepayers had been given an opportunity to vote on it they would have voted for it as other towns have done.

It was pointed out by Mr. Norman McKenzie that the newly installed power generating system was of a kind obsolete 50 years ago, as the belt is subject to slipping. It was observed that if the council had consulted a firm of electrical engineers on this power proposition before deciding on a new power plant, this mistake would have been avoided.

MARRIAGES

MORRISON—THOMPSON

A very pretty wedding was solemnized at the home of Mr. Martin Thompson, on February 2nd, when his daughter Martha was united in marriage to Mr. David Morrison. The bride was attired in ivory satin, trimmed with beads, and carrying a bouquet of roses and lily of the valley. Miss Ethel Amundsen, who acted as bridesmaid, wore a gown of sky blue georgette, trimmed in white tulle. The groom was supported by his brother, Spence Morrison.

The ceremony, which was performed by Rev. Langille, of Granum, took place at 6 o'clock. The bride entered the room as Mrs. Thompson played the wedding march. The ceremony was followed by a wedding supper, some thirty guests being served. Tables being tastefully decorated with carnations and wedding cake.

The happy couple were the recipients of many handsome and useful gifts, as follows:

Gas lamp, Martin Thompson.
Cut glass bowl, Nettie Thompson.

Set of dishes, Mr. and Mrs. Morrison.

Bread tray, Mr. and Mrs. B. Nelson.

Half dozen tablespoons, Mr. and Mrs. O. Thompson.

Half dozen tablespoons, Mr. and Mrs. Mrs. Norgard.

Cut glass bowl, Ethel and Leona Amundsen.

Half dozen sherbet dishes, Mr. and Mrs. North.

Pyrex pie plate, Miss Alma Walker.

Half dozen knives and forks, Mr. and Mrs. Nils Thompson.

Set of cutlery, Mr. and Mrs. Lloyd Morrison.

Clock, Mr. and Mrs. Geo. Ringrose.

Table cloth, Mr. and Mrs. Thomas Thompson.

Half dozen teaspoons, Dr. A. S. Morrison.

Set of pepper and salt, Mr. and Mrs. Cecil Morrison.

Carving set, Mr. Oscar Anderson.

The gift of the groom to the bride was a string of beads; to the bridesmaid, an onyx bar pin; to the best man, cuff links.

They left on the evening train to spend the honeymoon at Banff. Mr. and Mrs. Morrison will reside at High River.

Claresholm And Stavelly Elks Hold Joint Installation

On the invitation of Stavelly Elks Lodge, a joint installation of officers of Stavelly and Claresholm Lodges was held at Stavelly on Tuesday night. D.D.G.R.R. Dr. Gibson of Calgary was the installing officer. Other prominent Calgary Elks, including Dr. Spankie, Judge McDonald, and Mr. Potts were there. About 40 Claresholm Elks were in attendance, and also a good representation from Granum.

The Stavelly brothers gave a warm welcome to the visitors and entertained them royally. A concert program was enjoyed by all, the Elks' Glee Club appearing in several numbers, and a step dance was also much appreciated. A fine banquet followed by speeches from prominent Elks present topped off the night.

Following are the officers of Claresholm Lodge No. 124, installed for the year: Past Exalted Ruler, H. A. Fairbairn; Exalted Ruler, John Bowie; Leading Knight, J. Welker; Loyal Knight, A. D. MacGregor; Lecturing Knight, E. Gilchrist; Treasurer, J. D. Dickmeier; Secretary, O. C. Arnestad; Chaplain, S. L. Fraser; Esquire, T. Hines; Inner Guard, C. B. Yokom; Tyler, Jack Laidlaw; Trustee, Martin Arnestad.

LETTER TO THE EDITOR

Mr. Editor:

After listening to the reports of the various committees of the council and comments thereon, one thing lingers longest in my mind, and that is: In the race for any position in the gift of the council, the fact of being a ratepayer seems to be a very decided handicap.

Yours,

Ratepayer.

The annual ratemakers meeting was a surprise for many, and as the majority of the ratemakers seemingly did not approve of the way the town's business had been conducted for the year past, some comment seems in order.

It seems that the council undoubtedly wished to a misdirected wish to serve the public, has put through several measures which were far from unanimous, and in at least one instance failed to consult the head of the committee affected by the measure under consideration. The mayor gave an explanation of this, but it seems somewhat lame.

The new engine, with hydro power practically next door, also seems to meet with the disapproval of taxpayers, especially as it was pointed out, that the equipment is obsolete and inefficient for the purpose it was installed.

There were other similar matters brought up, and in one instance the councillor whose report was under discussion got himself tangled up and was unable to answer the questions put to him, the chairman of the meeting having to come to his rescue. This does not look like a good advertisement for the councillor in question, if he seeks re-election. Taxpayers would do well to investigate matters fully before casting a vote on February 14.

ANSWERS TO LAST WEEK'S QUESTIONS

15. What Is Light?
Light is caused by motions in the ether, that intangible something supposed to occupy all space—even a vacuum. Light waves have the properties common to all waves (study question 17 carefully). Light travels so fast that to the ordinary observer it is instantaneous. Its speed is 186,000 miles a second—equal to 7 times around the world. It travels from the sun to the earth in about 8 minutes.

16. What Makes the Different Colors?

It has been fully established that there are wave lengths in the ether that do not affect the sight, just as there are wave lengths in the air that do not affect the hearing. The range of vision light is covered by waves varying in length from about 65,000 to 35,000 per in. The shorter waves (65,000 per in) give the sensation of violet light. As the waves increase in length we have all the shades of blue, green, orange, etc., until we reach those of 35,000 per in, which give red light. Daylight (white light) is waves of all colors mixed together. If it falls on a body which we see as green, all the different colored rays except the green are absorbed and the green rays reflected. Colored rays differ only in the length and frequency of their respective waves, and the eye is able to distinguish between them. A black object absorbs practically all the light. A green glass allows only green rays to pass through it and absorbs all the others.

17. How Do We See?

The working of the human eye is like a camera in many respects. The camera has a shutter to control the amount of light required; the pupil of the eye performs a similar duty. The camera has a lens, which refracts, (bends) the light waves and brings them to a focus on the sensitive plate

in the rear of the camera. The Crystalline Lens in the front of the eye focuses a picture of all the object on the retina, the sensitive part of the optic nerve which spreads over the inner surface of the back of the eyeball and does the seeing. A camera is focused by means of movable slides or by substituting a lens of different curvature. The normal human eye adjusts itself in much the same way. Eyes that fail to adjust properly for distance are known as far-sighted or near-sighted.

18. What Is Color Blindness?

Color blindness is a total or partial inability to distinguish or recognize colors. It is usually inherited. It may be a red-green blindness when these two colors appear gray. To others red appears green and green as red.

19. Make a Diagram for Us in Describing Waves—Light, Radio, Sound, Etc.

(1) Draw an up-and-down curved line left to right across a sheet of paper; (2) draw a straight line through the center of the curved line; (3) put a letter "v" on the end of the line, to make it resemble an arrow point; (4) place an "a" just above the first top curve, a "b" above the second one; (5) draw a dotted line a to b; (6) put a "c" just below the first bottom curve and an "o" at the beginning of the straight line. The following properties are common to all waves: Length, Amplitude, and Period (time); a and b represent the crest, or highest point of the wave; c the trough, or lowest point of wave motion; the distance one crest to the next (a to b) is a wave length; o represents the general level of the medium; (say a pond of water) when at rest (an equilibrium) and no motion; the length of the greatest movement in either direction, or a to a or o to c, is the Amplitude, or half the height of the wave. The time taken for any point to make a complete cycle of motion, as a to c to b, is known as the Period or time taken for any single wave to pass a single point. The individual particles do not move forward with the wave, but simply rise and fall as the wave motion passes.

20. Why Can't We See Around the Corner of a Building?

Light from any source whatever proceeds in straight lines until it reaches some object, and is reflected from the object at the same angle at which it reaches it. If there is anything between the eye and the object, the rays of light from the object will not go around the obstruction and reach the eye. Light rays can be reflected however, and one could see around a corner by the use of

mirrors; a submarine sees in this way when submerged.

21. What is the Origin of Ground Hog Day?

Long before the discovery of America there was an old-established folk-lore story in parts of Europe that the bear or the beaver had the ability to make long range weather forecasts on Candlemas day (Feb. 2). The American colonists brought this tradition with them, but substituted an animal to fit their new environment by giving the task of regulating the length of the winter to the ground hog (woodchuck) the large rodent (gnawing) mammal (animal that suckles its young), quite common in the eastern portions of the U. S. and Canada. It is about 18 inches long, grizzled reddish-brown fur, digs a deep burrow and hibernates (passes the winter in a state of torpor). On February 2 he is supposed to be awakened from his sleep and carefully ventures forth on an inspection trip. If he sees his shadow he returns and prepares to sleep for six more weeks; if he does not see his shadow, the winter is over and he does not return to winter quarters. This little bit of nonsense seems to persist from generation to generation.

Big Crowd Attends

Ice Carnival

A very nice crowd attended the Monique (Canada) put on by the Elks Hockey Club on Friday night.

A considerable number of adults and children came in costume, giving the rink a festive appearance, where a general air of merriment prevailed.

The main attraction, the ladies hockey game between Starny and Clareholm proved very amusing and entertaining although the final score was 0-0.

Prizes were awarded to the judges Rev. Beldridge, Miss Alf Lewis and Sergeant Hildon, to the following:

Ladies fancy dress—Mrs. Murray come—Miss Holmes Girls fancy dress—Madeline McMillan come—Miss Baudin Gents fancy dress—Murray Palmer come—Joe Weiler Boys fancy dress—Dan Martin come—Young Moore.

School Fair Executive Elects Officers

A well attended meeting of the School Fair Executive was held in Mr. Milnes office on Sat. evening Jan. 20th.

The minutes of the last annual meeting were adopted as read. The secretary gave a report of the last School Fair in which 15 schools with a total of 20 rooms took part. Mr. Laurier, the treasurer, gave a statement of the financial standing which was satisfactorily received by the meeting. However, a few schools had failed to send in their contributions.

The election of officers resulted as follows: Pres. J. Davison; Vice Pres. E. Ship; Secretary H. Gault. The meeting appointed a committee to revise the prize list. It was suggested that the date of the fair should be September 16, 1927.

Here and There

"Sighs." The Vulcan well in the Turner Valley field has taken its place as one of the deepest oil wells in the world, having passed the 5,000-foot depth. Both oil and gas have been encountered by the drillers and are prepared to go 6,000 feet.

A record mangal, weighing 38 pounds, has been grown by Dr. Culvert of the "White House," Snake River, Idaho, following other records produced on his farm. He has just sold a ton of them, consisting of 100 mangals, averaging 20 pounds apiece.

Toronto—The first shipment of furs from this point to the United Kingdom, valued at \$10,000, has left recently via the Canadian Pacific Express. There were 15 boxes in all including the International 1,000 champion and grand champion of the 1925 Royal Agricultural Winter Fair, valued at \$1,500.

Philadelphia—The silver cup for the best display of poultry at the recent Philadelphia Poultry Show was won by the Hon. John S. Starlin, Ontario Minister of Agriculture.

A newly constructed line of the Canadian Pacific Railway between Umanit and Lacombe in the Province of Saskatchewan is now in operation. This line 300 miles in length will greatly assist the farmers of the district in marketing their grain.

HOT DOGS And Others

By Dick

Appropos of the Burns celebration held all over the world recently, we found the following in the Crowsnest Sun:

Reason for Crowsnest Not to wear kilts: The hill was too draughty and besides, there are no hip pockets in kilts.

Also the following:

A mystery that puzzles me And keeps me awake at night Is why they take their trousers off Whenever they blow their pipes.

At the rate payers meeting Joe B. quoted a civil question and it started a civil war.

More power to Joe.

The following quotation from Geo. Elliot strikes our fancy, though not in the sense that Elliot wrote it:

"Blessed influence of one true loving human soul on another! Not reducible by algebra, not deducible by logic."

Most certainly not deducible by logic.

When it becomes necessary for the chairman of a meeting to take up the subject for a resolution, that councillor, that councillor is well qualified to put it such.

Ain't it funny?

In this issue appears a letter to the editor, stating that it seems to be a disadvantage to holding a job connected with the town, to be a rate payer.

Your contention does not only hold good for jobs in the town, it goes for practically everything the town has to give out.

50 plus 60 equals 100 and so does 99 plus 1

Using town funds to buy Xmas presents for officers of a financial institution who ought to be glad to get the town's business, seems not only a waste of money, but a sickly kind of worship of the representatives of Mountain.

FOR SALE: A number of mission instruments comprising mostly equinox and irons slightly used. Excellent for routing newly married couples out of bed.

Apply to O.C. Armstrong

Donald Deerfoot in a sensational western drama "Golden Gulch" a thrilling tale of the early days of '49, coming to I. O. F. Hall, Clareholm, Thursday evening, February 10. A story of the outlaw country where lynch law is king and danger is real, and crime and vice run rampant together. A story of wide appeal, packed with daring situations and climaxes, pathos and comedy. High class vaudeville between acts. Popular prices.

C. G. I. T. GIRLS CORNER

If she has a sunny smile

She's C. G. I. T.

If she's helpful all the while

She's C. G. I. T.

If she's just the kind of a scout

Always too happy and busy to part

Full of vitality, originality.

She's C. G. I. T.

Our song book has arrived and we

are sure the girls will be delighted

with it. It provides the group with a

collection of songs of the latter type.

It will be found a good many folk

songs English and American especially.

Then there are a few lovely

Indian songs, patriotic songs and

negro melodies, and last of all the

much loved C. G. I. T. hymns and

chimes of which the girls seem never

to grow tired.

This week our thoughts are centered

on the Self-A-Sist Campaign

which begins next Saturday and lasts

all week. We hope our friends may

help us to obtain the Gold Honors as

much credit.

Do you know:

1. That the enrollment for Canada is

3500 girls?

2. That the enrollment for Alberta is

1500 girls?

3. That all money raised for C. G. I. T.

work in Alberta has been obtained by

the efforts of the leaders and girls

themselves?

The girls will be heartening direct-

ly and wish to help other girls.

One of our girls sends in the following

lines, but is too modest to sign her

name:

There are not many poets

So I thought I'd try, you see,

Alberta's girlhood needs your help.

And I hope you won't mind

Next week to buy a note or two.

Good! This is a Star to Light the Way

for the other girl!

QUALITY & YOKOM SPONSOR

SHIR CHEVROLET LECTURE

The first lecture given by General

Votes under the auspices of their

representatives. Quality and

Yokom, see Wednesday afternoon.

Under the I.O.O.F. hall packed to

the doors with a crowd which took part

in the proceedings.

Mr. Lee Gully acted as chairman

and introduced Mr. Henry Wilson,

factory representative, who after a few

words introduced Mr. Gray Henry, the

lecturer.

Mr. Henry spoke for about an hour

on the construction and operation of

Chevrolet cars, illustrating his talk

by exhibiting the parts he spoke of.

A cross section of an engine and rear

axle as well as several minor parts

were displayed on the stage.

At the conclusion of his lecture Mr.

Henry showed a moving picture "How

Man Conquers Time," depicting the

progress of transportation from the

early man days to the present day.

After cigars had been presented to

all the holders of the lucky ticket was

given a present.

MINING CAMP DRAMA

COMING TO I.O.O.F. HALL

"Golden Gulch" at once captures

the days of the old mining camp, the

days of the old gold rush. It is a

very short story, the fact that

Calvin Jones, Kit Carson and a

genuine scout are figures in the

western drama which will appear at

the Old Follies hall on Thursday

evening. The drama is a real

modern drama of mining days and

the days when hard law prevailed

and a man's life was depended on

his own strength and his own

hard man's hands and camp followers

Clareholm Local News

Stanley Long left the hospital on Thursday.

Mrs. Taylor R. N. spent a few days in Calgary this week.

Mr. and Mrs. Ben spent some days in Calgary this week.

Mrs. Brooker has been spending a few days in Calgary.

Pete Crow and Mr. Roberts of Barons spent Monday in town.

Billy Hughes is back in the hospital, very ill with pneumonia.

Hank Fanning, an old timer, was in town looking up old friends.

Mr. Gaudier, principal of the C. S. A., made a trip to Calgary this week.

Sam Gibson has been confined to his home for some time with a bad cold.

Wesley Rogers of Stavely was admitted to the local hospital this week for tonsillitis.

Mr. and Mrs. J. G. Dickenson left for Calgary on Tuesday to visit Mr. Dickenson's brother.

Harry Carey in the big western picture "Dustin" thru on Friday and Saturday nights this week.

Isabel Reid, daughter of Mr. and Mrs. Earl Reid, was a patient in the local hospital this week.

Mrs. J. E. Moffatt, Mrs. W. D. Munro and Mrs. Moffatt are spending several days in Calgary.

Ed. Gibble has purchased a substitute DeForest-Crosley radio set from the Clareholm Garage Ltd.

Mrs. John Goozee of New Norway, Alberta, spent Thursday the 27th inst. in Clareholm, visiting old friends.

Dave Francis of Meadow Creek bought a new Ford touring car this week from the Clareholm Garage Ltd.

The Queen's Hotel celebrated its 10th anniversary on Monday evening with a banquet, of which some 70 guests partook.

Gordon B. Walker, M. L. A., spent a few days in Edmonton this week. Mr. Walker will leave for the session next Monday.

The Stavely-Clareholm hockey game here on February 1st was postponed on account of the I.C.E. installation of officers that night.

C. E. Tillotson, who has severed his connection with the Central Garage, is now with the Clareholm Garage Ltd. as a salesmen.

Frank Calahan and Roger Wallis attended the Calgary-Kelowna hockey game in Calgary last Tuesday. Young Wallis continued to predict that the Tigers will win the League.

Motorists will do well to remember that they must secure '27 licenses by February 15, or they will be liable to arrest and fine if caught driving with old license plates after that date.

On Wednesday, February 9th, a meeting of St. John's the Evangelist Church of England Ladies Guild will be held at 3 p.m. All members are urgently requested to attend. Business important.

A shower in honor of Miss Mary Thompson was held at the home of Mrs. Soley on January 25th. A pleasant afternoon was spent. Miss Thompson received a large number of gifts. Lunch was then served.

On Saturday, February 12, a tea will be held in the Parish Hall under the auspices of the Sunday school Bible Class and Senior Guild of St. John's church in aid of purchasing Bibles for use in the Sunday school. Admission 25 cents.

The Elks committee are making big preparations for their annual Valentine dance, to be held on Monday night, February 14, in the I. O. O. F. Hall. The Blackbirds seven piece orchestra has been engaged for the occasion. All who attended last year's dance will remember what a good time they had, and can look forward to having fully as good a time this year.

Wm. Ryan of Clareholm, who became walking champion of Iowa and Illinois on February 26, 22 years ago, will try a come-back this year on February 26, when he enters the 25 mile walking race, promoted by the Army & Navy Club of Calgary.

On January 19th a shower was held at the home of Mr. and Mrs. Lloyd Morrison in honor of David Morrison and Martha Thompson. The evening was spent in games, after which Master Gordon Morrison and Master Clarence Nordgard appeared with a basket full of useful articles. Mr. Geo. King rose in a few well chosen remarks wished the bride and groom every happiness. Lunch was then served, after which the jolly crowd dispersed to their homes.

Clareholm Elks have appointed a committee to look into the proposition of building a covered skating rink in Clareholm, with a view to taking the initiative in securing this very desirable addition to the community. On Wednesday it is too early to make any definite announcement until the committee reaches its conclusions and presents them to the lodge. But the Review will say this: that if the Elks do decide to put their shoulder to the wheel the success of the project is a foregone conclusion.

Rev. Charles E. Thomson, district superintendent of the Church of the Nazarene, arrived on Saturday evening, preached twice at the local church on Sunday, acted as chairman of the annual local church business meeting on Monday evening, held a evangelistic meeting on Tuesday evening, culminating in four souls at the altar, and the announcement that the present pastor, Mrs. Oliver E. Dean, was unanimously called to the pastorate of the church for another year. Rev. C. E. Thomson left for Lethbridge on Wednesday. A pleasing incident to the people of Clareholm is that Rev. R. W. Dalgleish and Rev. Charles E. Thomson, who have for four years closely associated in the ministry of the Methodist church years ago, and they availed themselves of the opportunity to visit together and renew old friendships.

WHEAT POOL MEETING WELL ATTENDED

Mr. R. C. Thomson, Secretary of the Alberta Wheat Pool, spoke to a representative gathering of farmers who will attend the I.O.O.F. hall on Saturday last, about the Wheat Pool movement. Mr. R. C. Thomson, M. L. A., was chosen for the occasion. He introduced J. Jesse Strong, the newly appointed Wheat Pool director. The latter said he was afraid the job was too big for him, but he would do his best. He then introduced Mr. Walter then introduced Mr. Gorman.

Mr. Gorman opened his lecture by saying he hoped his audience would not think him an amateur farmer. He said he was a practical farmer having homesteaded. He did not intend to go into the formation of the Pool, but intended to give his hearers a glimpse into the operation of it.

The price of wheat was supposed to be governed by the law of supply and demand, but he said that this was not the case. The controlling factor was immediate supply and demand. The world consumed up approximately 100,000,000 bushels of wheat per day, so there was a constant demand. The main factor was the supply. If the demand was met from day to day the price would keep steady but if the total yearly demand was not met in September, October and November the price would naturally slump. So far the farmer had taken his grain and asked "What will you give me?" The Pool was changing this.

Last year the pool handled more than 50 per cent of Canada's total wheat surplus. It was the Pool that kept its shoulders under the price. He urged every pool member to bring in a new member, as those farmers who get the benefits of the price with out being members, were getting a free ride.

Several questions were asked by members of the audience which appeared to be answered satisfactorily. Mr. Gorman, accompanied by Mr. Strong, spoke in Mucedon the same night.
